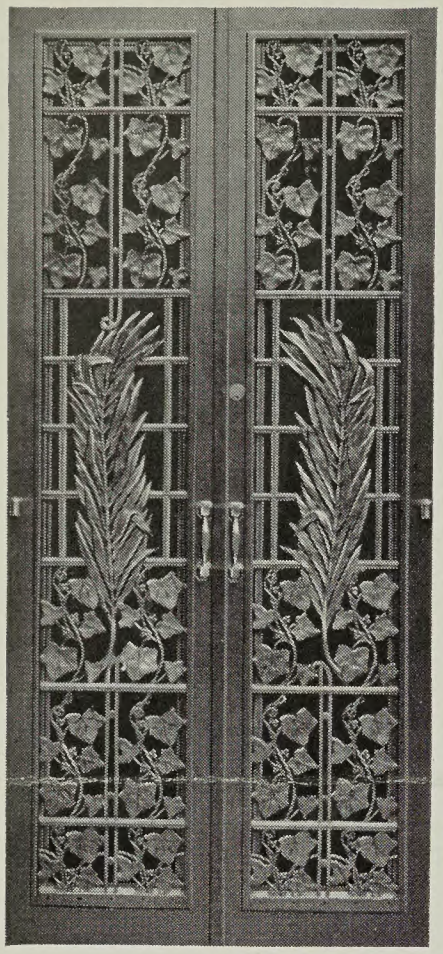
Michaels
PRODUCTS



Bronze mausoleum doors are available in several standard designs or custom built

Architects everywhere are familiar with and specify Michaels building products because: (1) they are the highest quality it is possible to produce; (2) Michaels' ability to faithfully reproduce in metal the most exacting demands and intricate details of architects' drawings is well known; (3) they can be depended upon to give lasting satisfaction. A few Michaels products are shown in these pages. There are many others. We'll be glad to work with you on all your metal building requirements.

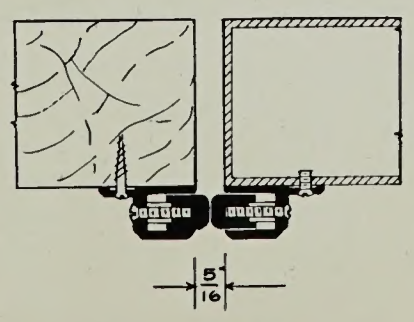
Extruded Thresholds
Museum Trophy Cases

ASTRAGALS (Adjustable)—compensate for the expansion and contraction of doors, and close as nearly as possible a door of any type to prevent drafts and to keep out dirt and dust. Michaels astragals are simple, sturdy, practical, and easily adjusted, if necessary. Made of extruded bronze, nickel or aluminum. Constructed of two members operated and adjusted by special spring and screws located approximately 10 inches on center. Special adjusting screw has two small lugs under the head which mesh into corresponding grooves on the astragal, preventing the screw from moving by vibration.

TYPE "A"

Surface Astragal

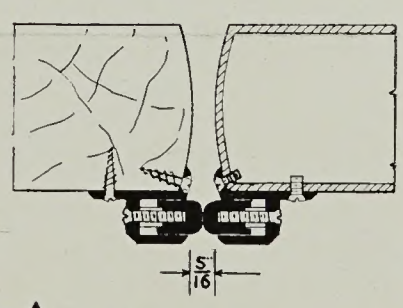
Applied to either wood or hollow metal bevel doors . . . or as a stop bead . . . or at bottom of door.



TYPE "C"

Half Mortise Astragal

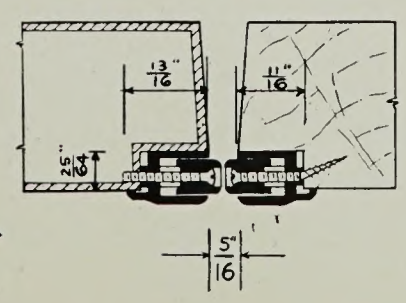
Applied on standard bevel hollow metal or wood door . . . or as stop bead.



TYPE "A-1"

Surface Astragal

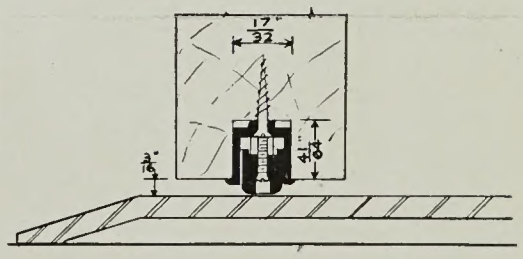
For surface application on bull-nose hollow metal or wood double door.

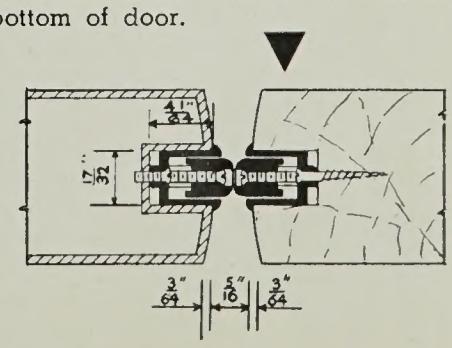


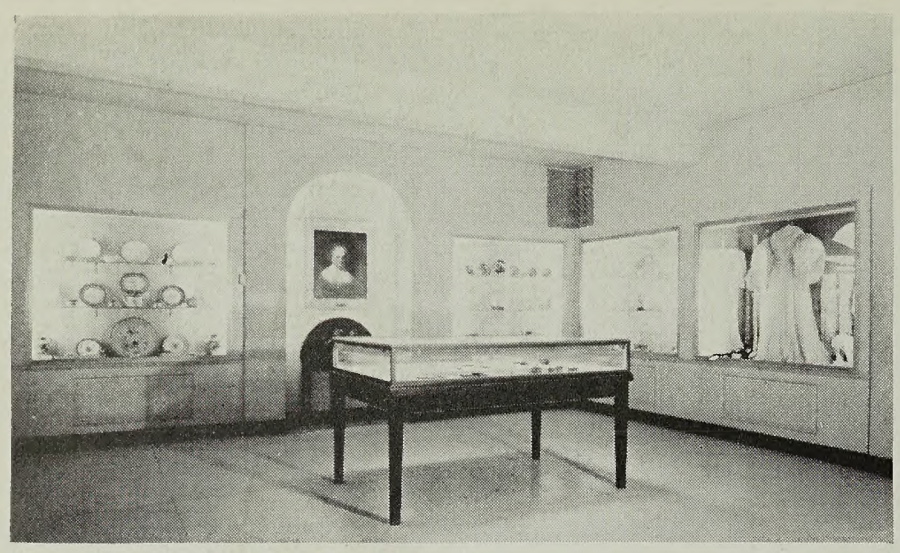
TYPE "E"

Mortise Astragal

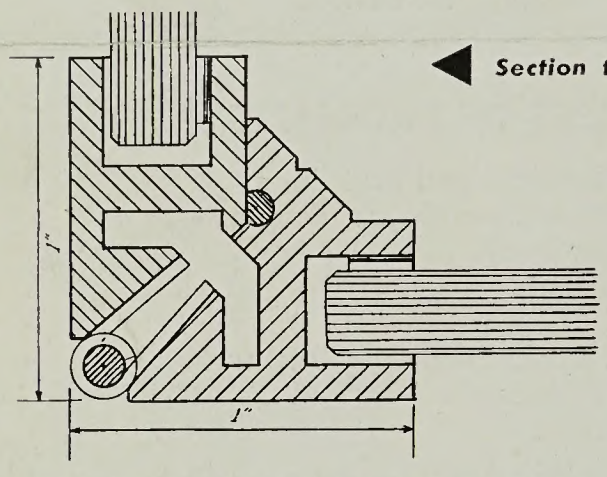
Applied on bull-nose hollow metal or wood double door . . . or at bottom of door.





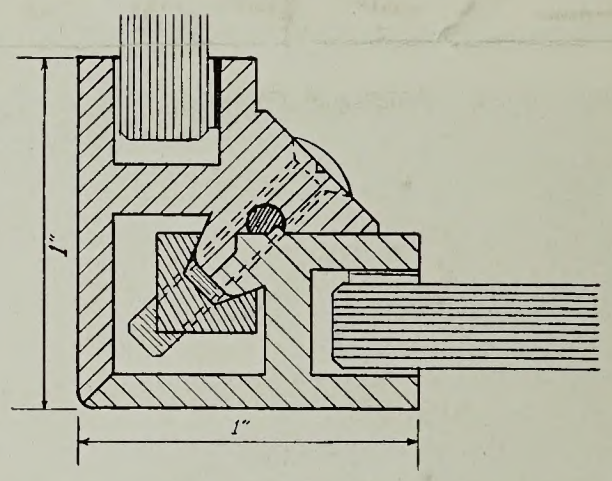


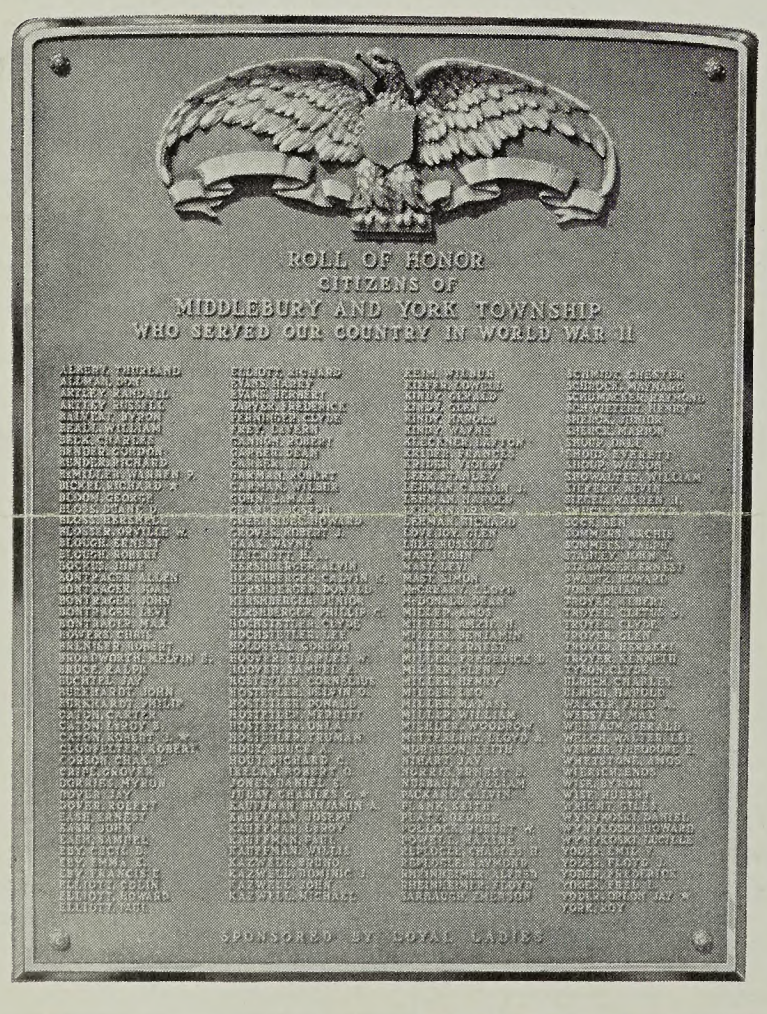
The illustrations directly above and at the right are two of many "Time-Tight" display cases Michaels manufactures for exhibits of every character. Write for literature containing styles, sizes, specifications and other information.

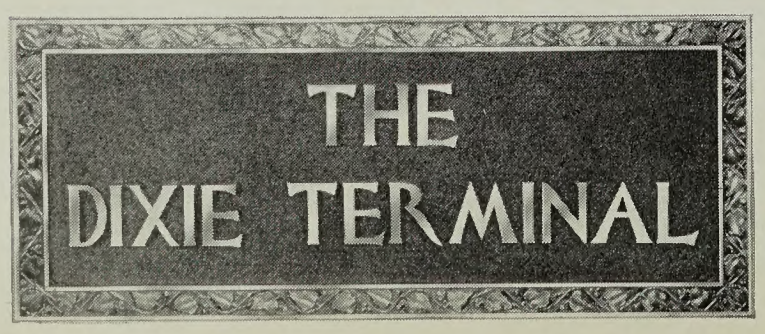


◀ *Section through hinged door case.*

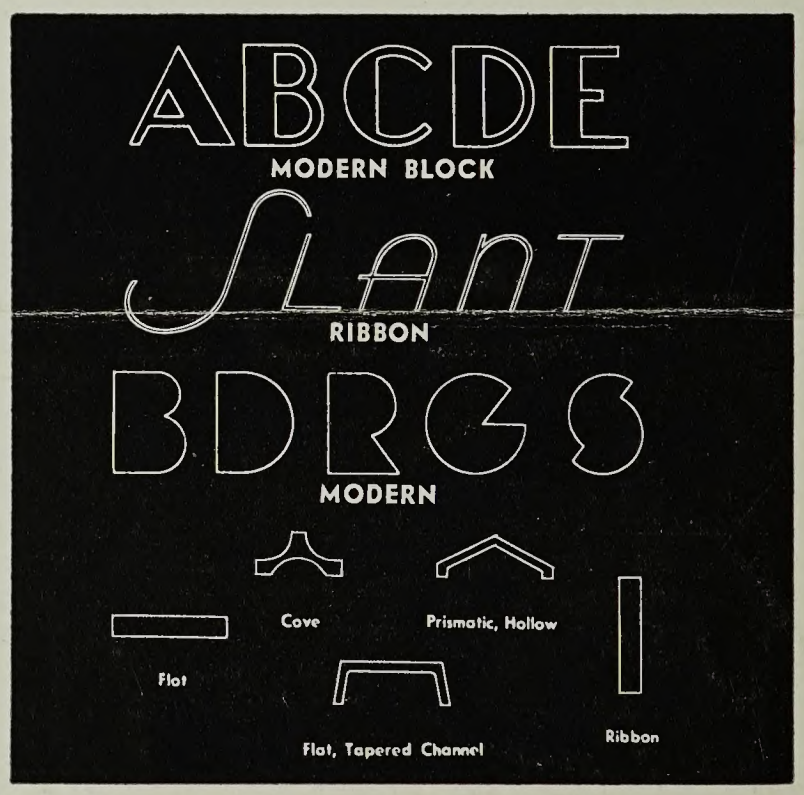
Section through corner frame showing innerlocking assembly and screw fastenings from inside of case. No screws exposed on face of frames.







Michaels Bronze Plaques are produced in many standard sizes and styles, or may be made to meet specific requirements. Tell us what you need and we shall be glad to submit sketches and prices. All borders and ornamentations are hand chased and burnished for contrast.



Almost any size metal letter may be produced in cast nonferrous metal, in flat, round, cove, prismatic or other face. A number of styles may be obtained in stock patterns, in sizes from 2" or 3" to 18" or 24". Special lettering designed by architects will be reproduced faithfully in any nonferrous metal specified.
